

Homework 2

October 7, 2017

0.0.1 Exercise 1

Write a program that takes as input a list of student grades. A student grade can be either A/B/C/D/F. output the number of students having each grade.

Example:

- input = ['A', 'A', 'B', 'C', 'C', 'C', 'D', 'F', 'F']

output:

- A: 2 Students
- B: 1 Student
- C: 3 Students
- D: 1 Student
- F: 2 students

0.0.2 Exercise 2 Sorting a list

- Write a program that takes as input a list, sort the list in an ascending order and print it out to user

Example:

- list = [5,2,10,1], output = [1,2,5,10]

In []:
